We Identify and **S.T.O.P.** Your Noise Problems

Installation Recommendations for...

Echo Eliminator™

Bonded Acoustical Pad Panels

- Using **NOISE S.T.O.P.™ ACOUSTICAL PANEL ADHESIVE**, cut the nozzle of the cartridge for a 1/4" bead of adhesive. Apply adhesive from corner to corner on the panel in an X zip-zag pattern. For a fast instant attachment apply a 6" circle of spray-on adhesive in each of the quadrants as show in the diagram. Apply pressure to both the bead adhesive and the sprayed ends and the sprayed areas. The spray on adhesive will keep the panel in place while the bead of **NOISE S.T.O.P.™ ACOUSTICAL ADHESIVE** cures to provide a long lasting permanent bond.

- Insure that the surface to which the panels are being applied to is clean and free from dust in order to insure a good bonding contact.
