UltraTouch® SoftSounds™ Natural Cotton Fiber Insulation

UltraTouch Softsound natural cotton fiber insulation is the successful combination of 25 years of insulation experience and are revolutionary patented manufacturing process that has created a superior and safe product.

UltraTouch Softsound is made from post-industrial denim and cotton fibers. UltraTouch Softsound™ does not itch and is easy to handle. There are no fiberglass nuisances to deal with such as facemasks, respirators, and protective clothing required prior to installation.

UltraTouch Softsounds patented proprietary process treats each individual fiber with a boron based fire retardant. This treatment not only acts as a superior fire retardant but also impedes the growth of fungus, mold, and resists pests.

UltraTouch Softsound is a Class 1 Building Product and meets the highest standards for fire and smoke ratings, fungi resistance and corrosiveness. It meets or exceeds ASTM testing for both commercial and residential batt insulation.

Installers will appreciate having peace of mind in knowing that the product they are installing is safe, easy to use, and good for the environment.

Now for the first time, you can have unmatched insulation, soundproofing, and fire resistant benefits all in one ecologically safe product—UltraTouch Softsound™.

We Identify and **S.T.O.P.** Your Noise Problems

UltraTouch[®] SoftSounds[™] Natural Cotton Fiber Insulation *Superior Acoustic Performance*

Controlling noise transmissions through walls, ceilings, and floors can be a complex challenge in designing and constructing a project. UltraTouch Softsound offers an extremely high Noise Reduction Coefficient to effectively reduce airborne sound transmissions including traffic, airplanes, radios, television, and conversation. UltraTouch Softsound will provide a quiet comfortable environment.

UltraTouch Softsound is made from natural denim and cotton. The inherent qualities in these fibers provide for extremely effective sound absorption.

UltraTouch's patented manufacturing technology creates a three structure that traps, isolates, and controls sound waves.

The result is exceptional soundproofing in every wall, every floor, and every room.

We Identify and **S.T.O.P.** Your Noise Problems

UltraTouch[®] SoftSounds[™] Natural Cotton Fiber Insulation Superior Thermal Performance

When it comes to comfort, UltraTouch SoftSounds provides maximum R-value performance.

UltraTouch SoftSounds unique construction contains tiny air pockets that work to maintain thermal consistency even in extreme temperature changes. Fiberglass insulation loses its thermal resistance in certain climate conditions.

UltraTouch SoftSounds is denser than fiberglass insulation so it retains its R-Value and provides a consistent thermal performance day in and day out.

UltraTouch SoftSounds is manufactured in both 16.50" and 24.50" widths to ensure a tight friction fit and fill capacity reducing any chance for air convection and infiltration that occurs with 15" and 23" fiberglass insulation widths.

UltraTouch SoftSounds microfibers provide for incredible memory and loft with virtually no settling after installation.

UltraTouch SoftSounds will help improve your heating and cooling efficiency resulting in energy and cost savings.

We Identify and **S.T.O.P.** Your Noise Problems

UltraTouch® **SoftSounds**™ Natural Cotton Fiber Insulation

Safe For You & The Environment

UltraTouch SoftSounds consists almost entirely of natural denim and cotton fibers that are 100% recyclable, reducing landfill waste. The denim and cotton are also 100% post-industrial, which assures that the fibers are free of any contaminants. UltraTouch SoftSounds requires a minimal amount of energy to manufacture aiding the environment with energy conservation and a reduction in pollution. Fiberglass manufacturing consumes considerably more energy and creates more pollution, while not breaking down or decomposing in landfills.

UltraTouch SoftSounds contains no chemical irritants and requires no warning labels compared to the carcinogenic warnings that fiberglass is required by law to display.

UltraTouch contains no harmful airborne particles that can get into HVAC systems and the surrounding environment causing health concerns.

UltraTouch SoftSounds also has no VOC outgassing concerns and contains no formaldehyde unlike fiberglass insulation.

By installing UltraTouch SoftSounds, you are making both your building and the environment a safer place to live, work, and enjoy.
